MAYMESTER 2018

Program Leaders:

Professor James L. Jenkins
Building Construction Management

Professor Scott W. Kramer
Building Science

AUBURN UNIVERSITY

PURDUE UNIVERSITY Study Abroad

International Construction Management in Ireland

This study abroad course will focus on the construction industry of Ireland. Students will tour new construction and historic renovation sites in the cities of Dublin, Cork, Limerick, and Galway. Students will also attend lectures/presentations by Irish faculty (Dublin Institute of Technology & the National Institute of Ireland-Galway) and construction personnel to gain insight into the construction industry of Ireland.

Cultural visits include the Guinness Brewery, Christ Church Cathedral, kissing the Blarney Stone, Cliffs of Moher, and the Aran Islands. Additional trips may include visits to the city of Cobh (last port of call for the ill-fated ship *Titanic*) and the lovely fishing village of Howth.

Students will earn three credit hours (BSCI elective) for this course.

The 2018 Study Abroad course is led by Professor Jenkins, who has lead the Ireland study abroad courses since 2009 and also lived in Ireland during a faculty exchange with the Dub-lin Institute of Technology during the Fall 2009
